Dual coaxial LED digital usb microscope

A34.4904-H2 Microscope combines traditional optical microscope with digital imaging system. 3.5 million pixel HD color image sensor and the newest 0.7-5x zoom camera offer the high quality images and displays.

1. Large depth of field, wide field of view, long operation distance and real vertical optical path.

2. Dual output HDMI&USB to support photograph/record and real time storage of SD card image, with USB 3.5M, HDMI 1080p/30fps.

3. Avoid tedious adjustment work and directly change the operation distance through eye-height adjustment ring (eye height effective value BFL: 11.6~36mm) and expand the original magnification ratio of the microscope.

4. Adopt advanced HDR image processing technique under HDMI mode to largely reduce light reflection of the observation object surface.

5. Dual coaxial LED light source--inner fixed coaxial LED light and outer brightness adjustable coaxial LED light.Turning on inner fixed coaxial LED light to observe ordinary objects,and the outer brightness adjustable coaxial LED light for metal objects can eliminate reflective effect.
