Product Details

Large Plate Stage Special Material Made, Particular Craftwork, Wearable & Resisting Cautery, Can Mount Extension Plate.

Reversed Quintuple Nosepiece, Excellent Design And Very Easy And Comfortable To Operate.

Attachable mechanical stage
Moving range: 120x78mm. It can clamp types of standard cell culture plates. With the help of related accessories, it could be used to move the dish, flask, slide and so on.

Wide-field plan eyepiece
New designed high eye -point wide-field plan eyepiece PL10X/22, has a full bright diagram without chromatic circle. International popular 22mm field of view is convenient for target seeking and counting.

Phase Contrast Accessories
Select a matching phase contrast slide on the basis of the chosen illuminator. With the phase contrast objectives, phase contrast observation can be realized. Thus you can acquire a better image contrast than the bright field. The cell image is with a strong sense of relief. You can use it to do a more detailed observation on those component parts of colorless transparent cells.

Digital Camera Adapter

Microscopy image can be output to monitor or computer by connecting the Trinocular tube and camera device. Then image analysis, processing, storage and transmission would be available.

LPLAN series long working distance plan infinity color corrected objectives, designed for living-cells culture in laboratory, clear image, good contrast, and also have a good performance under fluorescence observation.

LPLAN PH series long working distance infinity phase contrast objectives. In addition to the realization of the bright field observation, the phase contrast observation function has been developed to make the view showing a sense of relief and a substantial increase in image contrast and resolution.
